GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

STATEMENT OF WATER DIVERSION AND USE

S 9407

This statement should be typewritten or legibly written in ink.

rec'd 9/1/77

A. Name of person diverting water George Scovel
Address O. Box 672 Gilroy, California 95020

B. Name of body of water at point of diversion #6 Butterfield Lake
Tributary to n/a Pescadero Creek

C. Place of diversion NW $\frac{1}{4}$ SE $\frac{1}{4}$ Section 1, Township 12S, Range 3E, MD B&M,
Santa Clara County, or locate it on sketch of section grid on reverse side with regard to section lines or
prominent local landmarks.

D. Name of works natural lake for stockwatering only.

E. Capacity of diversion works n/a
Capacity of storage reservoir 4 acre-feet
State quantity of water used each month in gallons or acre-feet

Year	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
	:	:	:	:	:	:	:	:	:	:	:	:	:

If monthly and annual use are not known, check months in which water was used. State extent of use in units, such as
acres of each crop irrigated, average number of persons served, number of stock watered, etc. 1000
range cattle water at this lake and 11 other ponds.

Maximum annual water use in recent years n/a gallons
acre-feet
Minimum annual water use in recent years n/a gallons
acre-feet
Type of diversion facility: gravity , pump
Method of measurement: weir , flume , electric power meter , water meter , estimate

F. Purpose of use (what water is being used for) stockwatering

G. General description or location of place of use (use sketch of section grid on reverse side if you desire) small natural lake on Sargent Ranch located about
seven miles southwest of Gilroy in the Pescadero Creek watershed.

H. Year of first use as nearly as known Prior to 1954

I. Name of person filing statement Stanley S. Skeehan
Position Organization Water Right Consultant
Address 210 16th Avenue, Santa Cruz, California 95062

I certify that the foregoing statements are true and correct to the best of my knowledge and belief.
